

Arrowquip Crowding Pens

£POA

The 3E System makes use of light and cattle behaviour to create flow, allowing for easy entry and exit. By strategically placing low 851mm sheeted panels across the point of entry and next to the forcing pen exit, cattle are drawn into the right direction as they see more light. The 3E BudFlow Forcing Pen greatly improves how cattle flow through the pen into the race by using cattle psychology to your advantage, allowing you to save time and effort. 8ft, 10ft and 12ft.

Product Details	
Category/Type	Livestock Equipment
Make	Arrowquip
Model	Crowding Pens
Year	New
Hours	-

Fleet Lane, Bredon, Tewkesbury, Gloucester, GL20 7EF
