Agricultural Security and Registration Theft Deterrent System

Agricultural theft is an estimated £1 million every week! A headache for the agricultural industry & its insurers. For the first time the industry has united behind one official agricultural equipment security & registration scheme. The scheme is CESAR, the premier initiative against equipment theft. To combat theft & aid recovery CESAR combines: State of the art Datatag ID technology,

Overt and covert deterrents. A low one off cost to protect your machine for life and a secure &
