

Vicon RO-M PRO Fertiliser Spreader

£POA

The RO-M is the perfect spreader for the medium segment of farms. Each spreading disc has 8 vanes and their length determines the working width of the machine. These 8 vanes contribute to the highly accurate spread pattern across the complete working widths reaching from 10 up to 24 metres and up to 27-28m as an option. With the easy to assemble aluminium extension rims the basic hopper capacity of 1100 litres can be increased up to 1550 or 2000 litres. Trim Flow border spreading and frame supported hopper cover is standard on this model. THE ADVANTAGES: RotaFlow spreading system. FlowPilot for quick and easy adjustment. Border spreading is easy!

Product Details
