

Vicon RO-XL PRO Fertiliser Spreader

£POA

Vicon RotaFlow RO-XL. The High Capacity Model. The RO-XL is the high capacity model of the RotaFlow range. The heavy duty construction of the RO-XL makes it possible to carry up a maximum of 3.450 or 3.900 litres of fertiliser with 3 extension rims. Easy setting and adjustment can be done with the FlowPilot on each spreading disc. An innovative drive line to each disc ensures gentle agitation due to the 'slow rotating' agitator system, which runs at 15% of the spreading disc speed. Both discs can be shut off independently to spread half the working width, essential for preventing lodging in tapering headlands. THE ADVANTAGES: RotaFlow

Product Details

Category/Type	Machinery
Make	Vicon
Model	RO-XL PRO Fertiliser Spreader
Year	New
Hours	-

Fleet Lane, Bredon, Tewkesbury, Gloucester, GL20 7EF
