Year	-
Hours	-

Veteran vitality has been specially formulated for horses and ponies from the first signs of ageing.

It contains a good calorie level to help with weight maintenance along with nutritional requirements for optimum health in older horses and ponies. Once soaked it forms a soft mash making it very easy for any horses with dental problems to chew. Veteran Vitality is high in fibre and low in starch and sugar making it kinder on the digestive system. A special blend of premium grade herbs are included, such as mint, nettle, chamomile and juniper, which also make it highly palatable, even to fussy feeders!
