

Conor 750 Side Spreader

£POA

The Conor side spreader is one of the strongest and most durable on the market today. It is built to operate in the most demanding of conditions and can handle a wide range of manure from solid to slurry. Conor side spreaders come in 4 models , the 400, 750, 900 and 1000. Heavy duty bearings are used and an 150mm balanced heavy wall rotor ensure maximum strength and balanced unloading. A protective timber rail is used to prevent loading damage and all models come with heavy duty keyed sprockets, case hardened flails and EN8 splined shafts and all models are finished with high quality 2 pack paint. All models except the 400 come with a
