Datatag CESAR

£POA

Agricultural Security and Registration Theft Deterrent System

Agricultural theft is an estimated £1 million every week! A headache for the agricultural industry & its insurers. For the first time the industry has united behind one official agricultural equipment security & registration scheme. The scheme is CESAR, the premier initiative against equipment theft. To combat theft & aid recovery CESAR combines: State of the art Datatag ID technology, Overt and covert deterrents. A low one off cost to protect your machine for life and a secure &

Product Details

Make	Datatag
Model	CESAR
Year	-
Hours/Mileage	NEW

Every item of machinery protected by the CESAR Scheme is permanently fitted with two unique and highly visible triangular identification plates which are tamper evident. Plus. Every system comes with a number of "Datatags" permanently hidden within the machine which can be located and read with special readers. Each system contains hundreds of Datatag Datadots® with another unique number permanently concealed throughout the machine making them virtually impossible to find and remove. Each system also contains a unique forensic Datatag DNA solution which is invisible to the naked eye and applied to the nooks and crannies of the machine.
