

Emily Rotor On Frame

£POA

Emily Rotor on Frame. 2.7m working cutting width. For high out put. Designed for large cattle farms. Fast and continuous cutting, Ideal for cutting large quantities of silage; up to 80 tons per hour. A cost-effective solution. This will enable dairy and cattle farmers to keep a clean sealed face on any silage clamp, therefore reducing waste and secondary fermentation. Currently on Matbro Cone and Pin Brackets. Please give us a call for more information.
