

JFC Saber Solar Floodlight

£199.00

The JFC Saber is the ideal solution for anyone looking for some self-sufficient outdoor lighting, that won't cost the earth to buy/install and nothing at all to run. It has a long run time and can be set to be controlled either by the remote (included in the cost) or set top automatic on the floodlight itself. It's recommended that these are installed at around 3–6 metres high so you get the best detection and light coverage, the detection distance will be around 8–12 metres. The 40W is ideally suited to farmyards, farm tracks, riding arenas, stable yards and general outdoors areas, in short anywhere that you may need light when it's dark.
