

Marksway Horsehage High Fibre

£10.83

HorseHage High Fibre has been made from selected ryegrasses which have been allowed to mature in order to attain high fibre and low protein and energy levels before harvesting. This means it is generally suitable for all riding club and Pony Club horses, native ponies, veterans, and those that are resting and convalescing.

The HoofKind logo indicates its suitability for horses and ponies prone to laminitis due to its low sugar and starch levels. This is achieved by the unique fermentation process that the grass
