

Merlo Tracked Transporter Range

£POA

The Cingo multi-purpose range of transporters are compact and highly manageable for working in tight spaces. A low centre of gravity ensures maximum transversal stability on slopes. The tracks allow for lower ground pressure and a better grip on deformed and irregular terrain. The versatility and multi-purpose qualities of the Cingo system are unique: the patented quick-coupling device allows for the use of countless different attachments. The wide range available includes models with capacities of 400kg to 1,200kg and consists of three types of machine: TRANSPORTERS: mini operating machines for transporting and loading materials.
