

Titan Barbed wire

£POA

High tensile barbed wire from the UK's market leader in agricultural, forestry and equestrian fencing. Made in the UK from Tornado wire, this high tensile barbed wire provides vital protection to a fence by defending it against downward compression by cattle or other heavy animals. Barbed wire can also be an important addition to fencing used for infrastructure or rural security applications, helping to deter unwanted climbing. Two lines running 5cm and 15cm above the fence are recommended as the best deterrent and optimum level of protection.

Product Details	
Category/Type	Fencing products
Make	Titan
Model	Barbed wire
Year	-
Hours	-

Fleet Lane, Bredon, Tewkesbury, Gloucester, GL20 7EF
